IR1 WIRELESS DATA READER

- Infrared data transmission
- Automatic shut down
- Easy to use by one button
- Battery operated

GENERAL DESCRIPTION

The IR1 monitoring data reader makes available the information stored in the transponer's memory on the site. Using the only one button on the unit, the address, the device type and the value of the managed variables will be available scrolled on the display. The IR1 is compatible with the network elements using HMS, SMC or Comtech protocols.
